NUST is now officially an ORCID member!

I am pleased to inform you that NUST has become the first and only university/research institution in Namibia, to become an ORCID member. ORCID, which stands for Open Researcher and Contributor ID, links all your research together, while you control the visibility of each piece of data.

It increases your discoverability to the public, thereby increasing funding opportunities and the possibilities of joint grant applications with notable partners. I strongly urge all researchers and postgraduate students to register on this platform <https://orcid.org/register>

Protect your Ideas...protect your Intellectual property

The Technology and Innovation Support Center (TISC), in collaboration with the Business and Intellectual Property Authority of Namibia (BIPA), was officially inaugurated at the High-Tech Transfer Plaza Select (HTTPS). The Center is the result of a collaboration between NUST, BIPA and the World Intellectual Property Organisation (WIPO).

There are two centers of this kind at the University, with the other located at the NUST Library. By promoting innovation, the NUST TISC provides a platform to access WIPO database of IP-related tools and information. It further encourages the development of new ideas, technologies, and products, playing a crucial role in fostering an entrepreneurial culture among students, faculty, and the broader community.
