# FACULTY OF COMPUTING AND INFORMATICS

## PROSPECTUS 2024

PAMIBIA  
UNIVERSITY  
OF SCIENCE  
AND TECHNOLOGY

# FACULTY OF COMPUTING AND INFORMATICS

**PROSPECTUS 2024**

*(Note: The final interpretation of all regulations in this Prospectus for the **Faculty of Computing and Informatics** shall be vested in Council)*

## NOTE

The Prospectus for the **Faculty of Computing and Informatics** is valid for 2024 only. Curricula and Syllabi may be amended for 2025. It is obtainable free of charge from:

### **The Registrar**

**Namibia University of Science and Technology (NUST)**  
**Private Bag 13388, Windhoek, NAMIBIA**

**Location:** 13 Jackson Kaujeua Street, Windhoek

**Telephone:** (+264-61) 207 2008 / 2118

**Fax:** (+264-61) 207 9118

**Website:** [www.nust.na](http://www.nust.na)

**E-mail:** [registrar@nust.na](mailto:registrar@nust.na)

Although the information contained in this Prospectus has been compiled as accurately as possible, Council and Senate accept no responsibility for any errors and omissions, which may occur. The University retains the right to amend regulations or conditions without prior notice.

Due to the rapidly changing external environment that many programmes operate in, and the University's desire to remain constantly relevant in its offerings, some programmes may be significantly amended after publication of this Prospectus. Please consult our website for the latest versions of our curricula, syllabi and academic regulations.

The fact that particulars of a specific programme, field of study, subject, or course have been included in this Prospectus does not necessarily mean that such a programme, field of study, subject, or course will be offered in the academic year 2024.

: **Dr Chudey Pride**, PhD Mass Communication (Advertising and Public Relations), M.Sc Mass Communication, B.A Mass Communication  
: **Dr Phillip Santos**, PhD (Jlsm/Media Studies), M.A Jlsm, BSc Hons (Jlsm/Media Studies), ND (Mass Comm/Broadcast Jlsm)  
: **Dr Wanja Njuguna**, PhD Media Studies (UNAM), M.A Print Comm (Daystar Univ. Kenya) M. Pub Admin (Harvard Univ. USA), Post Graduate Certificate in Research Methodology (PGCRM) (Robert Goron Univ, Scotland), BA Comm (Messiah College USA)  
: **Jordania Andima**, MA (Multimedia Journalism – Print & Online), B. Mass Media (Jlsm/Photography)

**Studio Technician** : **Francois Andreas**, Apple Cert: Help Dest (Apple Online Course), Ass A+ Cert: CompTIA Online Course and Language (UNAM)

# UNDERGRADUATE PROGRAMMES

## UNDERGRADUATE PROGRAMMES

### QUALIFICATIONS OFFERED

	CODES
Certificate in Advanced Web Technologies	07CAWT
Certificate in Big Data Technologies	07CBDT
Certificate in Ethical Hacking and Information Security	07CEHI
Bachelor of Computer Science (Systems Administration, Communication Networks or Software Development)	07BACS
Bachelor of Computer Science (Systems Administration or Communication Networks)	07BCMS
Bachelor of Computer Science (Software Development)	07BCMS
Bachelor of Computer Science in Cyber Security	07BCCS
Bachelor of Computer Science in Cyber Security	07BCCY
Bachelor of Informatics	07BAIF
Bachelor of Informatics	07BAIT
Bachelor of Journalism and Media Technology	07BJOU

### Description

Computer Science and Informatics refer to the skills and knowledge needed to design applications and operate computer systems. Computer Science and Informatics Studies at the Namibia University of Science and Technology offer different areas of specialisations as well as different exit levels. Journalism and Media Technology equips students with theoretical knowledge and practical skills to produce news for a variety of media and responsibly report a wide range of social issues, as well as to represent organisations as public relations practitioners.

**Bachelor of Computer Science in Cyber-Security:** for those who successfully completed all requirements for the three-year degree of the phasing in (2021) programme.

**Bachelor of Computer Science (Systems Administration, Communication Networks or Software Development) or Bachelor of Informatics:** for those who successfully completed all requirements for the three-year of the phasing in (2020) programme.

**Certificate in Advanced Web Technologies, Certificate in Big Data Technologies and Certificate in Ethical Hacking and Information Security:** for those who successfully complete all requirements for the one semester certificate of the three CEIT programmes.

**Bachelor of Journalism and Media Technology:** For those who successfully completed all requirements for the three-year degree of the phasing in (2021) programme.

### Special Faculty Assessment Regulations

There are situations where assessment of an individual course provided by other Faculties will supersede assessment regulations. This reflected in the course documentation.

### Final Examination consists of two papers: Theory and Practical

A sub-minimum of 40% must be obtained in each paper. The combined examination mark must be at least 50% overall. In-course mark and examination mark shall be used jointly to determine the final mark in the ratio of 50% (semester mark) to 50% (examination mark) or 60% (semester mark) to 40% (examination mark) or as specified in the course outline.

### Course Evaluation for all courses offered by the Faculty utilising in-course assessment and a Theory Paper

An in-course mark is determined by continuous evaluation made up of tests and assignments during the semester. Students must have satisfactorily completed to the minimum standard (40% overall) all assignments and tests during the semester to be admitted to the final examination.

### Final examination consists of one Theory Paper

A sub-minimum of 40% must be obtained in the examination. In-course mark and examination mark shall be used jointly to determine the final mark in the ratio of 50% semester mark to 50% examination mark.

In-course mark and examination mark shall be used jointly to determine the final mark in the ratio of 50% (semester mark) to 50% (examination mark) or 60% (semester mark) to 40% (examination mark) or as specified in the course outline.

**Course Evaluation for all courses offered by the Faculty using Continuous Evaluation only**

The semester mark is determined by continuous evaluation made up of a minimum of four assessments during the semester. The course mark is the final mark. Students must obtain a 50% mark to pass the course. Supplementary tests and extensions will be defined within the individual course outline.

**Remote Teaching, Learning and Assessment (RTLA)**

The semester mark is determined by continuous evaluation made up of a minimum of four assessments during the semester. The number of assessments for both existing continuous assessment courses and converted exam-based courses to continuous assessment courses are reduced from a minimum of four (4) assessment as per current regulation to three (3) assessments to ensure a consistent and equal number of assessments for all students;

50% of the weight of the assessments should be conducted under controlled conditions.

50% can be different assessments for example: two tests, but it should be conducted under controlled conditions similar to those under which the institutional examinations are conducted.

**Controlled conditions include the following**

- \* Timed tests on the MODDLE Platform;
- \* Structured questions that students answer on paper using a cam scanner and upload it after the test within 15 Minutes; and/or
- \* Using software (Safe Exam Browser) that block-restrict the use of any applications on a student's device.

***NB: For all assessments, the NUST plagiarism policy applies***

**CERTIFICATE IN ADVANCED WEB TECHNOLOGIES**

**07CAWT**

**NQF Level: 7**

**NQF Credits: 60**

**NQF Qualification ID: Q2016**

**Description**

The Certificate in Advanced Web Technologies provides students with an understanding of the emerging approaches in Web technologies. It seeks to equip students with the practical skills required to design and implement Web applications. The programme will further expose students to advanced concepts, tools and methods used to build internet-based applications. The programme further aims to develop student’s ability to communicate these insights to stakeholders within their respective organisations.

Graduates of this programme will be able to find employment in both the public and private sectors, in roles that include, but are not limited to lead developers in Software Development teams or designers. They can also team-up with other graduates and participate in a joint venture.

**Admission Requirements**

Applicants must have completed a Diploma programme at NQF Level 6 in Computer Science, Information Systems, Information Technology or Informatics or an equivalent qualification from an accredited institution. Applicants with one year experience in the afore-mentioned fields will be given priority.

Applicants from other science and engineering disciplines or with prior leaning experience may be admitted into this programme at the discretion of the Centre. Such applicants may be required to write a test or an interview to guide the selection.

**Articulation Arrangements**

Transfer of credits will be dealt with according to NUST regulations on Recognition of Prior Learning. This provides for course-by-course credits as well as credit transfer by volume under certain academic conditions. The maximum credit that can be granted is 50% of the total credits for the qualification.

The Certificate is a programme with a single exit route, referred to as the professional route and as such, articulation arrangements are only acceptable between programmes offered by the CEIT. The Certificate in Advanced Web Technologies will not lead to further academic study.

**Mode of Delivery**

The programme will be delivered on full-time (day and/or evening) in accordance with NUST rules. The e-learning platform, provided all requirements for such delivery mode are met, will be part and parcel of the delivery mode to enhance course content reachability and administration of assessments and student engagement.

**CURRICULUM**

**YEAR 1**

**Semester 1**

<b>Course Title</b>	<b>Course Code</b>	<b>Pre-Requisite</b>	<b>NQF Level</b>	<b>NQF Credit</b>
Computer Programming Concepts	CPC711S	None	5	10
Web Programming 1	WPG711S	None	7	8
Database Concepts	DCS711S	None	7	8
Web Programming 2	WPG721S	None	7	12
JavaScript-based Web Technologies	JWT711S	None	7	10
Project	PRJ711S	None	7	12

**CERTIFICATE IN BIG DATA TECHNOLOGIES**

**07CBDT**

**NQF Level: 7**

**NQF Credits: 60**

**NQF Qualification ID: Q2015**

**Description**

The Certificate in Big Data Technologies (CBDT) provides students with an understanding of the emerging technologies that facilitate the storage, processing and analysis of bit data. It seeks to equip student with the practical skills required to turn large volumes of data into actionable insights. The programme exposes students to the design and building of platforms and systems that can handle the gigantic amount of data available today. The programme further aims to develop students’ ability to communicate these insights to stakeholders within their respective organisations.

Graduates of this programme will be able to find employment in both the public and private sectors in roles that include but are not limited to software development, data analysis, Dev-ops (a new job description at the frontier of software development and infrastructure operations) and systems administration.

**Admission Requirements**

Applicants must have completed a Diploma programme at NQF level 6 in Computer Science, Information Systems, Information Technology or Informatics or an equivalent qualification from an accredited institution. Applicants with one-year experience in the afore-mentioned fields will be given priority.

Applicants from other science and engineering disciplines or with prior learning experience may be admitted into this programme at the discretion of the Centre. Such applicants may be required to write a test or an interview to guide the selection.

**Articulation Arrangements**

Transfer of credits will be dealt with according to NUST regulations on Recognition of Prior Learning. This provides for course-by-course credits as well as credit transfer by volume under certain academic conditions. The maximum credit that can be granted is 50% of the total credits for the qualification.

The Certificate is a programme with a single exit route, referred to as the professional rout and as such articulation arrangements are only acceptable between programmes offered by the Centre. The Certificate in Big Data Technologies will not lead to further academic study. E.G. Honours or Masters. The Certificate in Big Data Technologies will not lead to further academic study.

**Mode of Delivery**

The programme will be delivered on full-time (day and/or evening) in accordance with NUST rules. The e-learning platform, provided all requirements for such delivery mode are met will be part and parcel of the delivery mode to enhance course content reachability and administration of assessments and student engagements.

**CURRICULUM**

**YEAR 1**

**Semester 1**

**Course Title**

<b>Course Title</b>	<b>Course Code</b>	<b>Pre-Requisite</b>	<b>NQF Level</b>	<b>NQF Credit</b>
Fundamentals of Linux Programming	FLB711S	None	7	10
Java Programming	JVP711S	None	7	10

**CERTIFICATE IN ETHICAL HACKING AND INFORMATION SECURITY**

**07CEHI**

**NQF Level: 7**

**NQF Credits: 60**

**NQF Qualification ID: Q2019**

**Description**

The Certificate in Ethical Hacking and Information Security aims to provide students with deeper insight, intellectual and cognitive skills related to the Information Technology (IT) security domain as well as prepare students to keep abreast with the ever evolving demands of the IT Industry. It seeks to equip students with the practical skills required to design and implement security measures in Computer Networks and Systems.

The programme will further expose students to advanced concepts, tools and methods used to protect internet-based systems and applications. Students will be able to take-up a certification course in the field of Information Security and may become members of professional/association bodies such as Certified Information Systems Security (CISSP), Certified Intrusion Analyst (CIA) and System Security Certified Practitioner (SSCP). The programme further aims to develop students’ ability to communicate these insights to stakeholders within their respective organisations.

Graduates of this programme will be able to find employment in both the public and private sectors in middle level positions that include but are not limited to Penetration Testers, IT Security Engineers and Security Analysis.

**Admission Requirements**

Applicants must have completed a Diploma programme at NQF Level 6 in Computer Science, Information Systems, Information Technology or Informatics or an equivalent qualification from an accredited institution. Applicants with one-year experience in the afore-mentioned fields will be given priority.

Applicants from other science and engineering disciplines or with prior learning experience may be admitted into this programme at the discretion of the Centre. Such applicants may be required to write a test or an interview to guide the selection.

**Articulation Arrangements**

Transfer of credits will be dealt with according to NUST regulations on Recognition of Prior Learning. This provides for course-by-course credits as well as credit transfer by volume under certain academic conditions. The maximum credit that can be granted is 50% of the total credits for the qualification.

The Certificate is a programme with a single exit route, referred to as the professional route and as such, articulation arrangements are only acceptable between programmes offered by the Centre. The Certificate in Ethical Hacking and Information Security will not lead to further academic study. E.g Honour or Masters.

**Mode of Delivery**

The programme will be delivered on full-time (day and/or evening) in accordance with NUST rules. The e-learning platform provided all requirements for such delivery mode are met will be part and parcel of the delivery mode to enhance course content reachability and administration of assessments and student engagement.

## UNDERGRADUATE PROGRAMMES

### SCHOOL OF COMPUTING

#### DEPARTMENT OF COMPUTER SCIENCE

CODE: 22

#### QUALIFICATIONS OFFERED

Bachelor of Computer Science (Systems Administration, Communication Networks or Software Development)

07BACS

Bachelor of Computer Science (System Administration or Communication Networks)

07BCMS

#### BACHELOR OF COMPUTER SCIENCE

07BACS

(Systems Administration, Communication Networks or Software Development)

(Phasing out 2020-2024)

NQF Level: 7

NQF Credits: 365

NQF Qualification ID: Q0513

#### Description

The Bachelor of Computer Science aims at providing educational opportunities for students who are interested in and motivated to work as Computer Scientists, Software Developers, Systems Administrators or Communication Networks Specialists.

This programme is purposefully designed to provide skilful competent and motivated graduates for the increasing and numerous challenging tasks of Computing and Information Technology (CIT) in the country and the Khomas region at large. Students will have the opportunity to develop the required cognitive/intellectual skills, practical as well as key transferable skills and apply these to address/solve CIT related problems/challenges in the context of an organisation, or the community.

Overall, this degree specifically aims to:

- \* Provide students with a sound foundation in the fundamental concepts, theories, frameworks and problem-solving techniques of CIT;
- \* Develop the ability of students to analyse information from a wide range of sources;
- \* Equip students with the requisite skills to work effectively as individuals and as members of a team;
- \* Enable students to communicate effectively in the workplace.

The programme intends to provide a diverse range of skills and competencies that are both discipline-specific and job-related. The curriculum is structured to facilitate specialisation in the areas of Systems Administration, Communication Networks and Software Development. The programme also intends to facilitate the development of highly generic cognitive and intellectual skills that will enable graduates to apply their knowledge and learnt competencies to the practices of CIT taking into consideration international generally accepted practices.

#### Admission Requirements

Candidates may be considered for admission to the Bachelor of Computer Science if they meet the University's General Admission Requirements. In addition, students must have a minimum "D" Symbol in NSSC Mathematics at Ordinary Level or equivalent. The Faculty reserves the right to consider candidates who have a D-symbol in NSSC Mathematics at Ordinary Level or equivalent through other relevant criteria.

#### Articulation Arrangements

Transfer of credits will be dealt with according to the University's regulations on Recognition of Prior Learning. These provide for course-by-course credits as well as credit transfer by volume under certain academic conditions. The maximum credit that can be granted is 50% of the credits for a qualification.

Upon successful completion of the Bachelor of Computer Science, students will ordinarily be able to pursue further studies in the same or a related cognate area of learning at NQF Level 8.

**BACHELOR OF COMPUTER SCIENCE  
(Systems Administration or Communication Networks)**

**07BCMS**

**NQF Level: 7**

**NQF Credits: 395**

**NQF Qualification ID: Q2250**

**Description**

The Bachelor of Computer Science aims at providing an educational opportunity for students who wish to be trained in computer science with a specialisation in Software Development, Systems Administration and Communication Networks. The programme will give students an opportunity to apply principles of computing and develop the cognitive and practical skills to address the growing demand in Software Development, Systems Administration and Communication Networks in the country, the region and worldwide. Additionally, the programme aims to equip students with the technical and soft skills required to build software that appeals to their users and addresses real problems.

Overall, the programme aims to:

- \* Provide students with a sound foundation in the fundamental concepts, theories and frameworks of Computing and Information Technology body of knowledge;
- \* Equip students with a sound foundation in core concepts of computer science and soft-ware development, system administration, and communication networks;
- \* Enable students to evaluate current technologies in computing and create high-quality software to address the challenges facing the knowledge economy that the world has embarked on.
- \* Enable students to work effectively as individuals and as members of a team;
- \* Enable students to communicate effectively in the workplace.

Graduates of this programme will be able to find employment in public and private sectors in various roles of Software Development specialists, Systems Administrators, and Network specialists. Furthermore, they will have the ability to exercise their creativity and create start-ups and companies with innovative solutions.

**Criteria for Admission**

Candidates may be considered for admission to the Bachelor of Computer Science if they meet the NUST General Admission Requirements (Part 1 of the Yearbook). In addition, applicants must have a minimum D-symbol in Grade 12/NSSC Mathematics at Ordinary Level, or equivalent.

**Articulation Arrangements**

Transfer of credits will be dealt with according to the NUST's regulations on Recognition of Prior Learning. These provide for course-by-course credits as well as credit transfer by volume under certain academic conditions. Maximum credit that can be granted is 50 % of the credits for a qualification.

Upon successful completion of the Bachelor of Computer Science Degree, graduates will be able to pursue their further studies in the same, or a related cognate area of learning at NQF Level 8.

**Mode of Delivery**

The programme will be delivered on full-time and part-time modes in accordance with NUST rules. With the provision that there is a reliable mechanism to monitor student access on the E-learning platform (or its extension), the online mode will also be considered.

**Requirements for Qualification Award**

The Bachelor of Computer Science degree will be awarded to students credited with a minimum of 395NQF credits, and who have met the detailed requirements as set out below.

In addition, students should meet the administrative and financial requirements as spelt out in Part 1 of the Namibia University of Science and Technology Yearbook. Students can specialise in Software Development, Systems Administration and Communication Networks.

**Transition Arrangements**

The Bachelor of Computer Science with specialisations in Software Development, Systems Administration and Communication Networks (old curricula) will be phased out systematically until 2024 with minimal disruption to existing students' learning progression.

The last intake of 1st year students for the Bachelor of Computer Science degree in Software Development, Systems Administration and Communication Networks (old curricula) was in January 2019. Students who were registered in 2019 for the 1st year of the Bachelor of Computer Science in Software Development, Systems Administration and Communication Networks (old curricula), and who failed more than 50 % of the courses at the end of 2019, will be required to change their registration to the Bachelor of Computer Science in Software Development, Systems Administration and Communication Networks (new revised curriculum) and will be granted credits on a course by course basis in accordance with the information in the Table below.

The Bachelor of Computer Science in Software Development, Systems Administration and Communication Networks (new/revised curriculum), will take effect from January 2020 and will be completely phased in by 2022.

Courses will only be offered based on the syllabi of new/revised courses in 2020, 2021 and 2022 (1st year), (2nd year), (3rd year). The new/revised curriculum will be offered from 2020.

Students who fail any of the courses in the old curricula will be required to repeat failed courses based on the syllabi of new/revised corresponding courses. Please refer to the Table below, for detailed information on the new/updated corresponding courses.

The deadline for the complete phasing out of the Bachelor of Computer Science in Software Development, Systems Administration and Communication Networks (old curricula) is 2024 after which students must automatically switch to the (revised curriculum).

**Courses to be credited**

**The Table above only highlights new/ revised core courses in Computer Science that should be done if courses in the old curricula are failed. Service courses from other Departments are excluded, but the rules of relevant Departments apply to this programme as well.**

The following old courses do not have corresponding courses in the Bachelor of Computer Science (new curriculum) and will be offered until the Bachelor of Computer Science (old curricula) will be phased out completely in 2024:

- \* Systems Audit (SAU620S)
- \* Computer Forensics (CFR712S)

**DEPARTMENT OF CYBER SECURITY  
QUALIFICATIONS OFFERED**

**CODE: 19**

Bachelor of Computer Science in Cyber Security (Phasing out 2021-2025)  
Bachelor of Computer Science in Cyber Security (Revised - Phased in 2021)

07BCCS  
07BCCY

**BACHELOR OF COMPUTER SCIENCE IN CYBER SECURITY  
(Phasing out 2021-2025)**

**07BCCS**

**NQF Level: 7**

**NQF Credits: 372**

**NQF Qualification ID: Q0656**

**Description**

The Bachelor of Computer Science in Cyber Security aims at providing educational opportunities for students who are interested in and motivated to work as Cyber Security Professionals. Cyber Security is a computing discipline that deals with digital information assurance and its security.

This programme is purposefully designed to provide skilled, competent and motivated graduates for the increasing and numerous challenging tasks of Computing and Information Assurance and Security (IAS) in the country and the region at large. Students will have the opportunity to develop the required cognitive/intellectual skills, practical as well as key transferable skills, and apply these to address/solve Information Assurance and Security related problems/challenges in the context of an organisation, a country or individual end-user.

**Admission Requirements**

Candidates may be considered for admission to the Bachelor of Computer Science in Cyber Security if they meet the University's General Admission Requirements.

In addition, students must have a minimum "C" symbol in Grade 12/NSSC Mathematics at Ordinary Level, or equivalent. The Faculty reserves the right to consider candidates who have a "D" symbol in NSSC Mathematics at Ordinary level, or equivalent through other relevant criteria.

**Articulation Arrangements**

Transfer of credits will be dealt with according to the University's regulations on Recognition of Prior Learning. These provide for course-by-course credits as well as credit transfer by volume under certain academic conditions. Maximum credit that can be granted is 50% of the credits for a qualification.

Upon successful completion of the Bachelor of Computer Science in Cyber Security, students will ordinarily be able to pursue further studies in the same or a related cognate area of learning at NQF Level 8.

**Mode of Delivery**

The programme will be delivered on the full-time and/or part-time modes in accordance with the University's rules. The e-learning mode will only be considered after the programme is deemed to have reached a certain level of maturity.

**Requirements for Qualification Award**

The Bachelor of Computer Science in Cyber Security degree will be awarded to students credited with a minimum of 372 NQF credits, and who have met the detailed requirements as set out below. In addition, students should meet the administrative and financial requirements as spelt out in the NUST Prospectus.

**Teaching and Learning Strategies**

Teaching and Learning strategies are described in the syllabus outlines for the different courses. The requirements of the NQF underline the acquisition of cognitive skills and competencies exceeding the knowledge and understanding of subject-specific knowledge items and professional/technical competencies.

Thus, the qualification focuses on the engagement of students in an interactive learning process in order to provide for the development of generic cognitive and intellectual skills, key transferable skills, and, as the case may be, subject specific and/or professional/technical practical skills.

This learning process will be facilitated both in and outside the classroom, requiring specific tasks to be carried out by the student, including the following:

- \* Formal weekly face-to-face (interactive) contact and presentation using PowerPoint slides, smart boards, whiteboards and handouts
- \* Formal weekly laboratory exercises and practice
- \* Student portfolios
- \* Formal tutorial and supervised self-study sessions
- \* Self-learning through online links
- \* Promotion of team learning through group projects
- \* Individual and home assignments
- \* Use of e-learning platform (Including emails and blog/-forum)
- \* Discussion and student presentations (assignment results and other activities)
- \* Guest lecturers with open discussion, when appropriate
- \* Webinar/Online conferencing/excursion
- \* Computer/Web-based simulation
- \* Seminars

### **Work Integrated Learning (WIL)**

This programme also includes a component of Work Integrated Learning (WIL), which integrates work experiences with learning in a way traditional education cannot do. It provides students with opportunities to:

- \* Execute tasks related to Cyber Security at the workplace
- \* Network with professionals and build relationships that can help students in their future endeavours
- \* Have access to companies for full-time positions after graduation once good rapport has been established between the students and the companies.
- \* Interact with people from diverse backgrounds and develop interpersonal skills that are not possible in a classroom environment.

The three courses that are done in the same semester as WIL will be taught before the students go for WIL and will be done through an accelerated teaching approach and assessed using “Diversified Continuous Assessment” mode, some of the assessments will be carried out while the students are busy with their WIL.

### **Transition Arrangements**

This programme does not replace any existing programme(s). Transition arrangements are therefore not applicable.

(Revised – Phased in 2021)**

**07BCCY**

**NQF Level: 7**

**NQF Credits: 383**

**NQF Qualification ID: Q2253**

**Description**

The Bachelor of Computer Science in Cyber Security is designed to provide skilful, competent and motivated graduates for the increasing and numerous challenging tasks of Computing and Information Assurance and Security (IAS) in the country, the region and the world at large. Students will have the opportunity to develop the required cognitive, practical as well as key transferable skills, and apply these to address IAS related problems and challenges.

**Criteria for Admission**

Candidates may be considered for admission to the Bachelor of Computer Science in Cyber Security if they meet the NUST General Admission Requirements (Part 1 of the Yearbook). In addition, applicants must have a minimum C-symbol in Mathematics at NSSCO Ordinary Level, or equivalent and have two subjects from Natural Sciences and Technology, all at NSSC Ordinary Level, or equivalent. The Faculty reserves the right to filter candidates who have a D-symbol in NSS Mathematics at Ordinary Level, or equivalent through other relevant criteria.

**Articulation Arrangements**

Transfer of credits will be dealt with according to the NUST’s regulations on Recognition of Prior Learning. These provide for course-by-course credits as well as credit transfer by volume under certain academic conditions. Maximum credit that can be granted is 50% of the credits for a qualification.

Upon successful completion of the Bachelor of Computer Science in Cyber Security, graduates will be able to pursue further studies in the same, or a related cognate area of learning at NQF Level 8.

**Mode of Delivery**

The programme will be delivered on full-time and part-time modes in accordance with NUST rules. With the provision that there is a reliable mechanism to monitor a student access on the E-learning platform (or its extension) the online mode will also be considered.

**Requirements for Qualification Award**

The Bachelor of Computer Science in Cyber Security degree will be awarded to students credited with a minimum of 383 NQF credits, and who have met the detailed requirements as set out below. In addition, students should meet the administrative and financial requirements as spelt out in Part 1 of the Namibia University of Science and Technology Prospectus.

**Transition Arrangements**

The Bachelor of Computer Science in Cyber Security (old curricula) will be phased out systematically until 2025 with minimal disruption to existing students’ learning progression.

The last intake of 1st year students for the Bachelor of Computer Science degree in Cyber Security (old curricula) was in January 2020. Students who were registered in 2020 for the 1<sup>st</sup> year of the Bachelor of Computer Science in Cyber Security (old curricula), and who failed more than 50% of the courses at the end of 2020, will be required to change their registration to the Bachelor of Computer Science in Cyber Security (revised curriculum) and will be granted credits on a course by course basis in accordance with the information in the Table below.

The Bachelor of Computer Science in Cyber Security (revised curriculum), will take effect from January 2021 and will be completely phased in by 2023. Courses will only be offered based on the syllabi of new/revised courses in 2021 (1st year), 2022 (2nd year) and 2023 (3rd year). The new/revised curriculum will be offered from 2021. Students who fail any of the courses in the old curricula will be required to repeat failed courses based on the syllabi of new/revised corresponding courses.

Please refer to the Table below, for detailed information on the new/updated corresponding courses. The deadline for the complete phasing out of the Bachelor of Computer Science in Cyber Security (old curricula) is 2025 after which students must automatically switch to the (revised curriculum).

**DEPARTMENT OF SOFTWARE ENGINEERING  
QUALIFICATIONS OFFERED**

**CODE: 29**

Bachelor of Computer Science (Software Development)

07BCMS

**BACHELOR OF COMPUTER SCIENCE  
(Software Development) (Revised-Phased in 2020)**

**07BCMS**

**NQF Level: 7**

**NQF Credits: 395**

**NQF Qualification ID: Q2250**

**Description**

The Bachelor of Computer Science aims at providing an educational opportunity for students who wish to be trained in computer science with a specialisation in Software Development, Systems Administration and Communication Networks. The programme will give students an opportunity to apply principles of computing and develop the cognitive and practical skills to address the growing demand in Software Development, Systems Administration and Communication Networks in the country, the region and worldwide. Additionally, the programme aims to equip students with the technical and soft skills required to build software that appeals to their users and addresses real problems. Through this programme, students will also be able to design, implement and evaluation a computing-based solution to meet a given set of computing requirements in the context of the programme's discipline.

Graduates of this programme will be able to find employment in public and private sectors in various roles of Software Development specialists, Systems Administrators, and Network specialists. Furthermore, they will have the ability to exercise their creativity and create start-ups and companies with innovative solutions.

**Criteria for Admission**

Candidates may be considered for admission to the Bachelor of Computer Science if they meet the NUST General Admission Requirements. In addition, applicants must have a minimum D-symbol in Grade 12/NSSC Mathematics at Ordinary Level, or equivalent.

**Articulation Arrangements**

Transfer of credits will be dealt with according to the NUST's regulations on Recognition of Prior Learning. These provide for course-by-course credits as well as credit transfer by volume under certain academic conditions. Maximum credit that can be granted is 50 % of the credits for a qualification.

Upon successful completion of the Bachelor of Computer Science Degree, graduates will be able to pursue their further studies in the same, or a related cognate area of learning at NQF Level 8.

**Mode of Delivery**

The programme will be delivered on full-time and part-time modes in accordance with NUST rules. With the provision that there is a reliable mechanism to monitor student access on the E-learning platform (or its extension), the online mode will also be considered.

**Requirements for Qualification Award**

The Bachelor of Computer Science degree will be awarded to students credited with a minimum of 395NQF credits, and who have met the detailed requirements as set out below.

In addition, students should meet the administrative and financial requirements as spelt out in Part 1 of the Namibia University of Science and Technology Yearbook. Students can specialise in Software Development, Systems Administration and Communication Networks.

**Transition Arrangements**

The Bachelor of Computer Science with specialisations in Software Development, Systems Administration and Communication Networks (old curricula) will be phased out systematically until 2024 with minimal disruption to existing students' learning progression.

The last intake of 1st year students for the Bachelor of Computer Science degree in Software Development, Systems Administration and Communication Networks (old curricula) was in January 2019. Students who were registered in 2019 for the 1st year of the Bachelor of Computer Science in Software Development, Systems Administration and Communication Networks (old curricula), and who failed more than 50 % of the courses at the end of 2019, will be required to change their registration to the Bachelor of Computer Science in Software Development, Systems Administration and Communication Networks (new revised curriculum) and will be granted credits on a course by course basis in accordance with the information in the Table below.

The Bachelor of Computer Science in Software Development, Systems Administration and Communication Networks (new/revised curriculum), will take effect from January 2020 and will be completely phased in by 2022.

Courses will only be offered based on the syllabi of new/revised courses in 2020 (1st year), 2021 (2nd year) and 2022 (3rd year). The new/revised curriculum will be offered from 2020.

Students who fail any of the courses in the old curricula will be required to repeat failed courses based on the syllabi of new/revised corresponding courses. Please refer to the Table below, for detailed information on the new/updated corresponding courses.

The deadline for the complete phasing out of the Bachelor of Computer Science in Software Development, Systems Administration and Communication Networks (old curricula) is 2024 after which students must automatically switch to the (revised curriculum).

## SCHOOL OF INFORMATICS, JOURNALISM AND MEDIA TECHNOLOGY

### DEPARTMENT OF INFORMATICS

CODE: 37

#### QUALIFICATIONS OFFERED

Bachelor of Informatics (Phasing out 2020-2024)

07BAIF

Bachelor of Informatics (Revised – Phased in 2020)

07BAIT

### BACHELOR OF INFORMATICS

07BAIF

(Phasing out 2020-2024)

NQF Level: 7

NQF Credits: 375

NQF Qualification ID: Q0512

#### Description

The Bachelor of Informatics aims to provide educational opportunities for students who are interested in and motivated to work as Informatics Specialists in Business Computing, Information Systems or related practices. Informatics harnesses the power and possibility of digital technology to transform data and information into knowledge that people use every day. This programme is purposefully designed to provide skilful, competent and motivated graduates for the increasing and numerous challenging tasks of Business Computing and Informatics in the country and the region at large. Students will have the opportunity to develop the required cognitive/intellectual skills, practical as well as key transferable skills, and apply these in order to address/solve Computing and Informatics (CI) problems/challenges in the context of an organisation.

Overall, this programme aims at:

- \* Providing students with a sound foundation in the fundamental concepts, theories and frameworks of Business Computing and Informatics;
- \* Developing the ability of students to analyse information from a wide range of sources;
- \* Equipping students with the requisite skills to work effectively as individuals and as members of a team;
- \* Enabling students to communicate effectively in the workplace.

The programme intends to provide a diverse range of skills and competencies that are both discipline-specific and job-related. The programme also intends to facilitate the development of highly generic cognitive and intellectual skills that would enable graduates to apply their knowledge and learnt competencies to the practices of Business Computing and Informatics, taking into consideration international generally accepted practices.

#### Admission Requirements

Candidates may be considered for admission to the Bachelor of Informatics if they meet the University's General Admission Requirements (G12.1 of the NUST Prospectus). In addition, students must have a minimum "D" symbol in Grade 12/NSSC Mathematics at Ordinary level, or equivalent. The Faculty reserves the right to consider candidates who have a "D" symbol in NSS Mathematics at Ordinary Level, or equivalent through other relevant criteria.

#### Articulation Arrangements

Transfer of credits will be dealt with according to the University's regulations on Recognition of Prior Learning. These provide for course-by-course credits as well as credit transfer by volume under certain academic conditions. Maximum credit that can be granted is 50% of the credit for a qualification.

Upon successful completion of the Bachelor of Informatics, students will ordinarily be able to pursue further studies in Informatics, or a related cognate area of learning, at NQF Level 8.

#### Transition Arrangements

The Bachelor of Informatics (New Curriculum), took effect from January 2014 and will be completely phased out by 2024. Students who fail any of the courses on the Bachelor of Information (07BAIF) (old curriculum) will be required to repeat such failed courses based on the syllabi of the new/revised corresponding courses.

**BACHELOR OF INFORMATICS  
(Revised - Phased in 2020)**

**07BAIT**

**NQF Level: 7**

**NQF Credits: 395**

**NQF Qualification ID: Q2251**

**Description**

The Bachelor of Informatics aims at providing educational opportunities for students who are interested and motivated to work as Informatics Specialists or in related practices. This programme is purposefully designed to prepare skilful, competent and motivated graduates for the ever-increasing and numerous challenging tasks of Informatics in the country and the region at large. Students will have the opportunity to develop the required cognitive/intellectual skills, practical as well as key transferable skills, and apply these to address/solve Computing and Informatics (CI) problems/challenges in the context of an organisation.

**Criteria for Admission**

Candidates may be considered for admission to the Bachelor of Informatics if they meet the NUST General Admission Requirements. In addition, applicants must have a minimum D-symbol in Grade 12/NSSC Mathematics at Ordinary Level, or equivalent.

**Articulation Arrangements**

Transfer of credits will be dealt with according to the NUST’s regulations on Recognition of Prior Learning. These provide for course-by-course credits as well as credit transfer by volume under certain academic conditions. Maximum credit that can be granted is 50% of the credit for a qualification. Upon successful completion of the Bachelor of Informatics, students will ordinarily be able to pursue further studies in Informatics, or a related cognate area of learning, at NQF Level 8.

**Mode of Delivery**

The programme will be delivered on both full-time and part-time modes in accordance with NUST rules.

**Requirements for Qualification Award**

The Bachelor of Informatics will be awarded to students credited with a minimum of 395 NQF credits. In addition, students must meet the administrative and financial requirements as spelt out in the NUST General Rules and Regulations.

**Transition Arrangements**

The Bachelor of Informatics (old curriculum) will be phased-out systematically until 2024 with minimal disruption to existing students’ learning progression. The last intake of 1st year students for the Bachelor of Informatics (old curriculum) was in January 2019.

Students who are registered in 2019 for the 1st year of the Bachelor of Informatics (old curriculum) and who fail more than 50% of the courses at the end of 2019, will be required to change their registration to the Bachelor of Informatics (revised curriculum) and will be granted credits on a course-by-course basis in accordance with the information in the Table below.

The Bachelor of Informatics (revised curriculum), will take effect from January 2020 and will be completely phased-in by 2022. Courses will only be offered based on the syllabi of new/revised courses in 2020 (1st year), 2021 (2nd year) and 2022 (3rd year). Students who fail any of the courses on the Bachelor of Informatics (old curriculum) will be required to repeat such failed courses based on the syllabi of new/revised corresponding courses. Please refer to the Table below, for detailed information on the new/revised corresponding courses to be done if courses in the old curriculum are failed.

The deadline for complete phasing out of the Bachelor of Informatics (old curriculum) is 2024, after which students must automatically switch to the Bachelor of Informatics (revised curriculum).

WIL710S	Work Integrated Learning	WIL710S	Work Integrated Learning

**NB: Exemption may not be granted for part of a course. Hence, in cases where more than one course in the old curriculum is replaced by one course in the revised curriculum, students who have failed any of the corresponding courses in the old curriculum will have to do the entire new course in the revised curriculum.**

**Please note:**

The Table above only highlights new/revised core courses in Bachelor of Informatics that should be done if courses on the old curriculum are failed. Service courses from other Departments are excluded, but the rules of relevant Departments apply to this programme as well.

The following old courses do not have corresponding courses in the Bachelor of Informatics (new curriculum) and will be offered until the Bachelor of Informatics (old curricula) will be phased out completely in 2024:

- \* BAP620S: Business Analysis & Process Management
- \* BAI620S: Business Accounting for Informatics

- \* HIT620S: Health Information Systems and Technology
- \* CSH710S: Computer Systems for Healthcare Services

**DEPARTMENT OF JOURNALISM AND MEDIA TECHNOLOGY  
QUALIFICATIONS OFFERED**

**CODE: 38**

Bachelor of Journalism and Media Technology

07BJOU

**BACHELOR OF JOURNALISM AND MEDIA TECHNOLOGY**

**07BJOU**

**NQF Level: 7**

**NQF Credits: 417**

**NQF Qualification ID: Q0677**

**Description**

The Bachelor of Journalism and Media Technology is designed to provide a systematic and coherent introduction to the main theories, broad principles, concepts, data, and problem-solving techniques in Journalism and Media Technology. Students will be equipped with both theoretical knowledge and practical skills that are greatly needed in journalism, multimedia technology and public relations disciplines. The programme further introduces students to the news production process as it occurs in a range of media, with an emphasis on media in Southern Africa. In that context, this programme will enable students to acquire cognitive skills, practical problem-solving skills, and key transferable skills that are necessary for addressing pressing challenges facing the journalism and media industries in Southern Africa.

Graduates of this programme should be able to find employment in the public and/or private sectors as journalists, public relations practitioners, media liaison officers, graphic designers, journalists for Internet-based platforms, communication officers at developmental organisations, and as community media managers, among others. Graduates will also be equipped to pursue entrepreneurial ventures and freelance in the field of Journalism and Media Technology industries.

**Criteria for Admission**

Candidates may be admitted to this Programme if they meet the General Admission Requirements of the Namibia University of Science and Technology (NUST).

Candidates who meet the minimum admission requirements will be required to write a special Final Selection English Test (not a placement test), as well as a journalism-related General Knowledge test. The final stage of the selection process will be a face-to-face interview.

Candidates who meet the Mature Age Entry requirements of NUST may be considered for admission.

**Articulation Arrangements**

Transfer of credits will be dealt with according to the NUST's regulations on Recognition of Prior Learning. These provide for course-by-course credits as well as credit transfer by volume under certain academic conditions. Maximum credit that can be granted is 50% of the credits for a qualification.

Graduates of the Bachelor of Journalism and Media Technology will ordinarily be able to pursue further studies in Journalism and Media Studies, or a related cognate area of learning, at NQF level 8.

**Mode of Delivery**

This programme will be offered *via* the part-time mode of study, in accordance with NUST rules. However, it may be offered via both full-time and part-time modes at a future date if required.

**Requirements for Qualification Award**

This qualification will be awarded to students credited with a minimum of 361 NQF credits, and who have met the detailed requirements below. Furthermore, students should comply with the administrative and financial requirements as indicated in the NUST General Rules and Regulations.

**Transition Arrangements:**

There is no significant difference between the old curriculum and the revised Bachelor of Journalism and Media Technology. In this light, the transition arrangement will be as follows: The Bachelor of Journalism and Media Technology (old curriculum) will phased out completely by end of the year 2020. The last intake of 1st year of the phased out programme (old curriculum) was in January 2020.

Students who are registered in 2020 for the 1st year of the phased-out programme (old curriculum) and who fail more than 50% of courses at the end of 2020, will be required to change their registration to the revised programme in 2021.

Similarly, Students who are registered in 2020 for the 1st year of the out-phasing programme (old curriculum) and who meet all requirements to progress to 2nd year will be required to transition to the revised curriculum in 2021. Students in this category will be required to pick up credits for the newly introduced first year course *Introduction to Media, Technology and Society*. All students will be granted credits on a course-by-course basis in accordance with information in the Table below.

The revised Bachelor of Journalism and Media Technology programme will be implemented at all levels in 2021 with concurrent implementation of 1<sup>st</sup>, 2<sup>nd</sup> and 3<sup>rd</sup> year. Courses will only be offered based on the new/revised syllabi in 2021. Students who fail any of the courses on the old curriculum will be required to repeat such courses based on the syllabi of new/revised corresponding courses (please refer to the Table below).

The deadline for completely phasing out the Bachelor of Journalism and Media Technology (old curriculum) is the end of the 2020 academic year, after which students must switch to the revised programme and fulfil all requirements based on the revised curriculum.

#### Courses to be credited

Course Code	Bachelor of Journalism and Media Technology (old courses)	Course Code	Bachelor of Journalism and Media Technology (equivalent new/revised courses)

# POSTGRADUATE PROGRAMMES

## POSTGRADUATE PROGRAMMES

### SCHOOL OF COMPUTING

#### DEPARTMENT OF COMPUTER SCIENCE

CODE: 22

#### QUALIFICATIONS OFFERED

Bachelor of Computer Science Honours (Communication Networks)	08BCCH
Master of Computer Science	09MACS
Doctor of Philosophy in Computer Science	10DPCS

#### BACHELOR OF COMPUTER SCIENCE HONOURS (Communication Networks)

08BCCH

NQF Level: 8

NQF Credits: 120

NQF Qualification ID: Q0509

#### Description

The Bachelor of Computer Science Honours is a postgraduate specialisation degree that aims at consolidating and deepening the knowledge and skills of students in the main cognate area of learning, as well as developing their capacity to conduct supervised research of an applied nature in disciplines related to software engineering.

The programme is purposefully designed to expose students to advanced concepts, theories, tools, and methods of Computer Science and their applications. In this context, specific emphasis is placed on internationally accepted general standards and practices, as well as key attributes that would enable graduates to assume supervisory/middle management and applied research positions in the Computing industry, academia, and in the public sector in general.

The curriculum is structured to facilitate specialisation in the areas of Software Development and Communication Networks.

#### Criteria for Admission

Applicants may be considered for admission to this programme if they have a Bachelor's degree in Computer Science, preferably in Software Development and Communication Networks or an equivalent qualification at NQF Level 7 from a recognised institution, worth at least 360 credits.

Applicants are required to submit the following documents with their applications:

- A professional resume, highlighting practical and professional Computing experience, if applicable;
- A written proposal/motivation for undertaking further studies
- A transcript of the undergraduate study

#### Articulation Arrangements

Transfer of credits will be dealt with according to the NUST's regulations on Recognition of Prior Learning. These provide for course-by-course credits as well as credit transfer by volume under certain academic conditions. Maximum credit that can be granted is 50% of the credits for a qualification.

Upon successful completion of the Bachelor of Computer Science Honours, students will ordinarily be able to pursue further studies in the same, or a related cognate area of learning, at NQF Level 9.

#### Mode of Delivery

The programme will be delivered on full-time and part-time modes in accordance with NUST rules. With the provision that there is a reliable mechanism to monitor student access on the E-learning platform (or its extension), the online mode will also be considered.

#### Requirements for Qualification Award

The Bachelor of Computer Science Honours degree will be awarded to students credited with a minimum of 120 NQF credits at NQF Level 8, and who have met the detailed requirements as set out below. In addition, students should meet the administrative and financial requirements as spelt out in the NUST General Rules and Regulations.

#### Transition Arrangements

The Bachelor of Computer Science Honours in Software Development, Mobile Development, Information Security, Digital Forensics and Communication Networks (old curricula) will be phased out systematically until 2021 with minimal disruption to existing students'

learning progression. The last intake of students for the Bachelor of Computer Science Honours degrees in Software Development, Mobile Development, Information Security, Digital Forensics and Communication Networks (old curricula) was in January 2019.

Students registered in 2019 on the old curriculum may opt to transition to the revised curriculum of Bachelor of Computer Science Honours in Software Development, and Communication Networks (revised curricula) in 2020 and will be granted credit on a course-by-course basis as described in the Table below. Such students, however, stand to lose credits.

The Bachelor of Computer Science Honours in Software Development, and Communication Networks (revised curriculum) will take effect from January 2020. Courses will only be offered based on the syllabi of revised courses in 2020. Students who fail any of the courses in the old curriculum will be required to repeat such courses based on the corresponding courses in the revised curriculum. Please refer to the Table below for detailed information on the new or revised corresponding courses to be done if students fail courses in the old curriculum.

The deadline for complete phasing out of the Bachelor of Computer Science Honours in Software Development, Mobile Development and Communication Networks (old curricula) is 2021. Students registered in 2019 on the out-phasing strand namely Mobile Development will be required to complete their studies based on the requirements of the old curriculum. These students will have until 2021 to complete their studies, after which all students must automatically switch to the Bachelor of Computer Science Honours in Software Development, and Communication Networks (revised curriculum).

**Corresponding Courses to be done (if failed) – This is not a credit table**

<b>Bachelor of Computer Science Honours (Software Development; Mobile Development; Information Security, Digital Forensics and Communication Networks) (Old Courses)</b>		<b>Bachelor of Computer Science Honours (Software Development, Communication Networks) (Corresponding New/Revised Courses to be done, if failed)</b>

**MASTER OF COMPUTER SCIENCE  
(Revised – Phased in 2021)**

**09MACS**

**NQF Level: 9**

**NQF Credits: 240**

**NQF Qualification ID: Q0504**

**Description**

The Master of Computer Science is a research-based programme, aims at providing continued scholarly development for students at an advanced level. The revised Master's degree is designed to develop student's scientific research skills in various areas of Computer Science for sustainable development.

The programme further aims to develop expertise and enable students to evaluate and apply Computer Science theories, techniques and models to solve complex problems in the specialised areas of Computer Science such as Communication Networks; Software Development; Mobile Development; Cyber Security; Digital Forensics, Data Analytics, Artificial Intelligence and other related disciplines. The programme will enable students to deepen their knowledge and skills to work independently, synthesise knowledge at the forefront of Computer Science, and conduct research using scientific methods.

Graduates of this programme will be prepared to pursue higher academic goals, including the Doctor of Philosophy (PhD) degree. Students will obtain skills and experience in up-to-date approaches to analysis, design, implementation, validation, and documentation of research related to specialised areas of Computer Science. With these skills, they will be well qualified for technical, professional, or managerial positions in government, business, industry, and education.

**Criteria for Admission**

Applicants, who hold qualifications from recognised institutions at NQF Level 8, or equivalent, in Computer Science or related cognate areas, may be considered for admission to this programme. Applicants need to provide evidence of having conducted supervised research at that level and may be required to make-up specific deficiencies in coursework (if deemed fit to address the critical gaps in core competencies) at the discretion of the Faculty Postgraduate Committee.

In addition, applicants may be required to attend a pre-selection interview at the discretion of the department. The Higher Degree Committee (HDC) will approve the final selection and admission of the candidates in accordance with the regulations as specified by the Rules for Postgraduate Studies of NUST. Registration prior to the approval of a research proposal is provisional and will be made official only when the Higher Degrees Committee approves the proposal. These procedures will be fully explained to each prospective student during his or her personal interview.

Applicants from other institutions must submit detailed information on all courses in their previous qualifications, as well as contact details of three referees. The latter also applies to applicants who have been working in the field subsequent to obtaining their previous qualifications. Exceptions may be approved by the Faculty Postgraduate Committee, and all admissions are at the discretion of the Faculty Postgraduate Committee.

Registration prior to the approval of a research proposal is provisional and will be made official only when the proposal is approved by the Faculty Postgraduate Committee. These procedures will be fully explained to each prospective student during his or her personal interview.

**Articulation Arrangements**

The Master of Computer Science will ordinarily provide access to further studies in the same, or a related cognate area, at Doctoral degree level, i.e. NQF Level 10.

**Mode of Delivery**

The programme will be offered by research on full-time and part-time delivery modes of study through flexible delivery system. However, the duration of studies for full-time and part-time modes of study shall be fulfilled as contained in the NUST Rules and Regulation for Postgraduate Studies.

**Requirements for Qualification Award**

This qualification will be awarded to candidates credited with a minimum of 240 credits (at NQF Level 09) and who have complied with all the requirements laid down in the University's rules and procedures for postgraduate studies leading to the award of research degrees. The thesis will represent the entire body of work to be assessed and must meet the university's requirements as detailed in the rules for postgraduate studies.

**Transition arrangements**

The Master of Computer Science (old curriculum) will be completely phased out by the end of 2020 with minimal disruption to existing students' learning progression, and after which students must automatically switch to the revised programme (revised curriculum) and fulfil all requirements based on the new curriculum. The revised Master of Computer Science (revised curriculum) will phased-in 2021.

**Assessment Strategies**

Students are required to submit a research proposal after six months for approval by the Higher Degrees Committee. It is compulsory that students attend regular research methodology seminars by attending face to face or by a virtual class/online class (Remote Teaching and Learning) until the approval of the research proposal.

Students are required to present work-in-progress every six months during research seminars for monitoring and assessment purposes. Students who fail the initial assessment of the research proposal will receive an extension of six months for re-approval. In compliance with the general requirements of the Senate, students are required to submit a thesis for evaluation, which should comply with international academic standards.

The thesis requires students to work independently and to investigate their own individual research topic. Students are required to cultivate a professional work ethic to deliver the combination of research, analysis, communication and presentation demanded by their thesis. The thesis will be assessed in accordance with the rules for studies at postgraduate level.

Students will present and defend their thesis before an appropriately constituted committee in accordance with the rules for postgraduate studies at the university. The thesis will be returned to students for correction before final binding and archiving. Final marks will only be released after submission of the corrected thesis.

**DOCTOR OF PHILOSOPHY IN COMPUTER SCIENCE  
(Revised – Phased in 2021)**

**10DPCS**

**NQF Level:**

**NQF Credits: 360**

**NQF Qualification ID:**

**Description**

The Doctor of Philosophy (PhD) in Computer Science programme is a research-based (by thesis only) programme designed to enhance and expand students' knowledge and expertise in the field of Computer Science and Computing-related fields. It aims at developing skilled and competent individuals with the ability to conceptualise, develop and conduct applied research in the field of Computer Science (e.g. Communication Networks; Software Development; Mobile Development; Cyber Security; Digital Forensics, Data Analytics, Artificial Intelligence and other related Computer Science body of knowledge).

The programme builds on previously acquired theoretical and practical knowledge at NQF level 9 and other scientific and industrial experience of the students to investigate and develop novel innovative ideas and products to solve problems in the field of Computer Science. The degree is designed for the candidates with Computer Sciences background who seek to deepen and enhance competencies in their specialised areas. The programme will create a critical mass of skilled individuals in the field of Computer Science that are of great need in the country and the world.

The end product of a PhD in Computer Science study is the thesis, an independent research project completed under the guidance of the supervisor that adds new knowledge to the field and prepares the graduate to embark on a scientific career. The PhD degree programme in Computer Science will provide guidance, training and mentorship for students from various Computer Science-related fields, with the aim of preparing the next generation of Computer Science experts and researchers.

**Criteria for Admission**

Applicants, who hold qualifications from recognised institutions at NQF level 9, or equivalent, in Computer Science or related cognate areas, may be considered for admission to this programme. Applicants need to provide evidence of having conducted supervised research at that level. In addition, applicants may be required to attend a pre-selection interview at the discretion of the department.

The Higher Degree Committee (HDC) will approve the final selection and admission of the candidates in accordance with the regulations as specified by the Rules for Postgraduate Studies of NUST. Registration prior to the approval of a research proposal is provisional and will be made official only when the HDC approves the proposal. These procedures will be fully explained to each prospective student during his or her personal interview.

**Articulation Arrangements**

The PhD in Computer Science is a terminal qualification; hence, articulation arrangements are not applicable.

**Mode of Delivery**

The programme will be offered on full-time and part-time delivery modes of study through flexible delivery system in accordance with NUST's Rules for Postgraduate Studies.

**Requirements for Qualification Award**

The Doctoral degree shall be awarded to candidates credited with a minimum of 360 credits at NQF Level 10 and who have complied with all the requirements laid down in the University's rules and procedures for postgraduate studies leading to the award of research degrees. The thesis will represent the entire body of work to be assessed and must meet the University's requirements as detailed in the rules for postgraduate studies.

**Transition arrangements**

The Doctor of Philosophy in Computer Science (revised curriculum) will be phased-in 2021 with minimal disruption to existing students' learning progression. The current programme (old curriculum) will be completely phased out by the end of 2020 after which students must automatically switch to the revised programme and fulfil all requirements based on the revised curriculum.

**Assessment Strategies**

Students are required to submit a research proposal six months after registration for approval by the Higher Degrees Committee. It is compulsory that students attend regular research methodology seminars by attending face to face or by a virtual class/online class (Remote Teaching and Learning) until the approval of the research proposal. Students are required to present a work-in-progress report every six months during research seminars for monitoring and assessment purposes. Students who fail the initial assessment of the research proposal will receive an extension of six months for re-approval. In compliance with the general requirements of the Senate, students are required to submit a thesis for evaluation, which should comply with international academic standards.

The thesis requires students to work independently and to investigate their own individual research topic and supervisor(s) can assist with the area depending on the needs at national level and the expertise. Students are required to cultivate a professional work ethic to deliver the combination of research, analysis, communication and presentation demanded by their thesis. The thesis will represent the entire body of work to be assessed in accordance with the rules for studies at postgraduate level.

Students will present and defend their thesis before an appropriately constituted committee in accordance with the rules for postgraduate studies at the University. The thesis will be returned to students for correction before final binding and archiving. The result of the Thesis will only be announced after correction and submission of the thesis as per university rules. Any other special arrangements on assessments will be done in accordance with the University’s rules and procedures for postgraduate studies.

**Quality Assurance Arrangements**

Qualified academics and relevant professionals with Doctoral Degrees will carry out the final assessment of the thesis. The appointment of Examiners and the composition of the Panel for the Oral Examination of thesis are specified in the Rules for Postgraduate Studies.

In addition to the doctoral degree the examiners should be knowledgeable in the area/field/discipline of the topic of the thesis to be examined (i.e. the examiner should have the necessary background to be able to make an informed judgement about the thesis); and should be research active in the discipline. This will be done in accordance with the regulations specified in the Rules for Postgraduate Studies and the NUST Guidelines for the Supervision and Examination of Masters and Doctoral Programmes, outlined in the NUST General Rules and Regulations.

**DEPARTMENT OF CYBER SECURITY**

**CODE: 19**

**QUALIFICATIONS OFFERED**

Bachelor of Computer Science Honours in Digital Forensics  
Bachelor of Computer Science Honours in Information Security

08BHDS

08BHIF

**BACHELOR OF COMPUTER SCIENCE HONOURS IN DIGITAL FORENSICS  
(Revised - Phased in 2021)**

**08BHDS**

**NQF Level: 8**

**NQF Credits: 120**

**NQF Qualification ID: Q02260**

**Description**

The Bachelor of Computer Science Honours in Digital Forensics aims at providing educational opportunities for students who are interested in and motivated to work as Digital Forensic Professionals. Students will gain the requisite knowledge required to enable them to deal with identification, presentation, analysis, documentation and preservation of digital evidence using scientifically proven and accepted processes.

This programme is designed to provide skilful, competent and motivated Digital Forensics graduates who can successfully identify attacks and breaches, understand the source, and recover any compromised data whenever a breach or an attack occurs using appropriate tools. As a branch of Computing and Information Assurance and Security, Digital Forensics will enable students to develop critical skills used in the presentation of evidence whenever a digital investigation is called for.

**Criteria for Admission**

Applicants may be considered for admission to this programme if they have a Bachelor's degree in Computer Science, preferably in Cyber Security, Systems Administration, and Communication Networks or an equivalent qualification at NQF Level 7 from a recognised institution, worth at least 360 credits.

Applicants are required to submit the following documents with their applications:

- A professional resume, highlighting practical and professional Computing experience, if applicable;
- A written proposal/motivation for undertaking further studies

**Articulation Arrangements**

Transfer of credits will be dealt with according to the NUST's regulations on Recognition of Prior Learning. These provide for course-by-course credits as well as credit transfer by volume under certain academic conditions. The maximum credit that can be granted is 50% of the credits for a qualification.

Upon successful completion of the Bachelor of Computer Science Honours in Digital Forensics, students will ordinarily be able to pursue further studies in the same, or a related cognate area of learning, at NQF Level 9.

**Mode of Delivery**

The programme will be delivered on the part-time mode in accordance with NUST rules. With the provision that there is a reliable mechanism to monitor student access on the E-learning platform (or its extension), the online mode will also be considered.

**Requirements for Qualification Award**

The Bachelor of Computer Science Honours degree in Digital Forensics will be awarded to students credited with a minimum of 120 NQF credits at NQF Level 8, and who have met the detailed requirements as set out below. Students are required to do four compulsory courses (worth 60 credits), an elective course (worth 15 credits) and a Mini-thesis (worth 45 credits). In addition, students should meet the administrative and financial requirements as spelt out in the NUST General Rules and Regulations.

**Transition Arrangements**

The Bachelor of Computer Science Honours in Digital Forensics (old curricula) (08BHDF) will phased out systematically until 2021 with minimal disruption to existing students' learning progression. The last intake of students for the Bachelor of Computer Science Honours degree in Digital Forensics (old curricula) was in January 2020.

Students registered in 2020 on the old curriculum may opt to transition to the revised curriculum of Bachelor of Computer Science Honours in Digital Forensics (revised curricula) in 2021 and will be granted credit on a course-by-course basis as described in the Table below. Such students, however, stand to lose credits.

The Bachelor of Computer Science Honours in Digital Forensics (revised curriculum), will take effect from January 2021. Courses will only be offered based on the syllabi of revised courses in 2021. Students who fail any of the courses in the old curriculum will be required to repeat such courses based on the corresponding courses in the revised curriculum. Please refer to the Table below for detailed information on the new or revised corresponding courses to be done if students fail courses in the old curriculum.

The deadline for complete phasing out of the Bachelor of Computer Science Honours in Digital Forensics (old curricula) is 2021. Students registered in 2020 on the out-phasing strand will be required to complete their studies based on the requirements of the old curriculum. These students will have until 2021 to complete their studies, after which all students must automatically switch to the Bachelor of Computer Science Honours in Digital Forensics (revised curriculum).

Students who fail the following old courses must register for the new/revised courses in the Bachelor of Computer Science Honours in Digital Forensics as listed in the Table below.

**Corresponding Courses to be done (if failed) - This is not a credit table**

(Revised - Phased in 2021)**

**08BHIF**

**NQF Level: 8**

**NQF Credits: 120**

**NQF Qualification ID: Q02261**

**Description**

The Bachelor of Computer Science Honours in Information Security aims at providing an educational opportunity for students who are interested in and motivated to work as Information Security Professionals. The programme places an emphasis on advanced knowledge and skills on protection of cyber systems and information through ensuring confidentiality, integrity and availability of those systems. Additionally, the programme is designed to expose students to advanced information security concepts, theories, tools, and methods in computer science.

Students will have the opportunity to develop the required 21st Century skills, practical as well as key transferable skills, and apply these to current Information Assurance and Security challenges in the context of organisations, countries and or individual use.

**Criteria for Admission**

Applicants may be considered for admission to this programme if they have a Bachelor's degree in Computer Science, preferably in Cyber Security, Systems Administration, and Communication Networks or an equivalent qualification at NQF Level 7 from a recognised institution, worth at least 360 credits.

Applicants are required to submit the following documents with their applications:

- A professional resume, highlighting practical and professional Computing experience, if applicable;

**DEPARTMENT OF SOFTWARE ENGINEERING  
QUALIFICATIONS OFFERED**

**CODE: 29**

Bachelor of Computer Science Honours (Software Development)

08BCHS

**BACHELOR OF COMPUTER SCIENCE HONOURS  
(Software Development)**

**08BCHS**

**NQF Level: 8**

**NQF Credits: 120**

**NQF Qualification ID: Q0509**

**Description**

The Bachelor of Computer Science Honours is a postgraduate specialisation degree that aims at consolidating and deepening the knowledge and skills of students in the main cognate area of learning, as well as developing their capacity to conduct supervised research of an applied nature in disciplines related to software engineering.

The programme is purposefully designed to expose students to advanced concepts, theories, tools, and methods of Computer Science and their applications. In this context, specific emphasis is placed on internationally accepted general standards and practices, as well as key attributes that would enable graduates to assume supervisory/middle management and applied research positions in the Computing industry, academia, and in the public sector in general.

The curriculum is structured to facilitate specialisation in the areas of Software Development and Communication Networks.

**Criteria for Admission**

Applicants may be considered for admission to this programme if they have a Bachelor's degree in Computer Science, preferably in Software Development and Communication Networks or an equivalent qualification at NQF Level 7 from a recognised institution, worth at least 360 credits.

Applicants are required to submit the following documents with their applications:

- A professional resume, highlighting practical and professional Computing experience, if applicable;
- A written proposal/motivation for undertaking further studies
- A transcript of the undergraduate study

**Articulation Arrangements**

Transfer of credits will be dealt with according to the NUST's regulations on Recognition of Prior Learning. These provide for course-by-course credits as well as credit transfer by volume under certain academic conditions. Maximum credit that can be granted is 50% of the credits for a qualification.

Upon successful completion of the Bachelor of Computer Science Honours, students will ordinarily be able to pursue further studies in the same, or a related cognate area of learning, at NQF Level 9.

**Mode of Delivery**

The programme will be delivered on full-time and part-time modes in accordance with NUST rules. With the provision that there is a reliable mechanism to monitor student access on the E-learning platform (or its extension), the online mode will also be considered.

**Requirements for Qualification Award**

The Bachelor of Computer Science Honours degree will be awarded to students credited with a minimum of 120 NQF credits at NQF Level 8, and who have met the detailed requirements as set out below. In addition, students should meet the administrative and financial requirements as spelt out in the NUST General Rules and Regulations.

**Transition Arrangements**

The Bachelor of Computer Science Honours in Software Development, Mobile Development, Information Security, Digital Forensics and Communication Networks (old curricula) will be phased out systematically until 2021 with minimal disruption to existing students' learning progression. The last intake of students for the Bachelor of Computer Science Honours degrees in Software Development, Mobile Development, Information Security, Digital Forensics and Communication Networks (old curricula) was in January 2019.

Students registered in 2019 on the old curriculum may opt to transition to the revised curriculum of Bachelor of Computer Science Honours in Software Development, and Communication Networks (revised curricula) in 2020 and will be granted credit on a course-by-course basis as described in the Table below. Such students, however, stand to lose credits.

The Bachelor of Computer Science Honours in Software Development, and Communication Networks (revised curriculum) will take effect from January 2020. Courses will only be offered based on the syllabi of revised courses in 2020. Students who fail any of the courses in the old curriculum will be required to repeat such courses based on the corresponding courses in the revised curriculum.

Please refer to the Table below for detailed information on the new or revised corresponding courses to be done if students fail courses in the old curriculum.

The deadline for complete phasing out of the Bachelor of Computer Science Honours in Software Development, Mobile Development and Communication Networks (old curricula) is 2021. Students registered in 2019 on the out-phasing strand namely Mobile Development will be required to complete their studies based on the requirements of the old curriculum. These students will have until 2021 to complete their studies, after which all students must automatically switch to the Bachelor of Computer Science Honours in Software Development, and Communication Networks (revised curriculum).

## SCHOOL OF INFORMATICS, JOURNALISM AND MEDIA TECHNOLOGY

### DEPARTMENT OF INFORMATICS

**CODE: 37**

#### QUALIFICATIONS OFFERED

Postgraduate Certificate in Informatics (Information Systems Audit)	08PGIN
Bachelor of Informatics Honours (Web Informatics)	08BIHW
Bachelor of Informatics Honours (Business Informatics)	08BIFB
Master of Data Science (Phased in 2022)	09MADS
Master of Informatics (Revised –Phased in 2021)	09MAIN
Doctor of Philosophy in Informatics (Revised-Phased in 2021)	10DPIN

### POSTGRADUATE CERTIFICATE IN INFORMATICS (INFORMATION SYSTEMS AUDIT)

**08PGIN**

**NQF Level: 8**

**NQF Credits: 60**

**NQF Qualification ID: Q0583**

#### Description

The programme is primarily designed to provide students with deeper insight, intellectual and cognitive skills related to their professional field and area of employment and help them to advance their career of choice. This programme further, exposes students to advanced concepts, theories, tools, and methods of Information Systems Audit.

The overarching aim of this programme is to prepare students for a career in the Information Technology (IT) audit field and for certification as an information systems auditor or information security specialist. Students will be able to take-up a certification course in this field and may become members of professional/association bodies such as the Information Systems Audit and Control Association (ISACA).

The Post Graduate Certificate in Informatics (Information Systems Audit) will not lead to further academic study, but graduates would gain credit for relevant courses should they opt to register for the Bachelor of Informatics Honours.

#### Criteria for Admission

Applicants must have a three-year Diploma or a Bachelor's degree or an equivalent qualification at NQF Level 7 with an Information Systems emphasis from a recognised institution. Applicants should also have at least two years' relevant work experience. Applicants are required to submit a professional resume, highlighting practical and professional experience, if applicable.

#### Articulation Arrangements

Transfer of credits will be dealt with in accordance with the NUST's regulations on Recognition of Prior Learning. These provide for course-by-course credits as well as credit transfer by volume under certain academic conditions. Maximum credit that can be granted is 50 % of the credits for a qualification.

Students who commenced a Bachelor of Informatics Honours (New), but discontinued their studies, may utilise academic courses passed for credit recognition in the Post Graduate Certificate in Informatics (Information Systems Audit).

Conversely, students who passed academic courses as part of this programme may utilise these for credit, if wishing ultimately to undertake the Bachelor of Informatics Honours (New).

#### Mode of Delivery

The programme will be delivered on part-time mode in accordance with NUST rules.

#### Requirements for Qualification Award

This qualification will be awarded to candidates credited with a minimum of 60 NQF credits at NQF Level 8, and who have met the detailed qualification requirements as outlined below. In addition, students must meet the administrative and financial requirements as spelt out in the Postgraduate Prospectus of NUST.

#### Transition Arrangements

The Post Graduate Certificate in Informatics (Information Systems Audit) (old curriculum) will phased-out completely end of 2020. The last intake of students for the Post Graduate Certificate in Informatics (Information Systems Audit) (old curriculum) was in January 2020.

Students who are registered in 2020 for the Post Graduate Certificate in Informatics (Information Systems Audit (old curriculum), and who fail more than 50% of the courses at the end of 2020, will be required to change their registration to the Post Graduate Certificate in Informatics (Information Systems Audit) (revised curriculum) and will be granted credits on a course-by-course basis in accordance with the information in the Table below.

The Post Graduate Certificate in Informatics (Information Systems Audit) (revised curriculum) will take effect from January 2021. Courses will only be offered based on the syllabi of new/revised courses in 2021. Students who fail any of the courses on the old curricula will be required to repeat such failed courses based on the syllabi of the new/revised corresponding courses. Please refer to Table 15.2 below, for detailed information on the new/revised corresponding courses to be done if courses on the Post Graduate Certificate in Informatics (Information Systems Audit) (old curriculum) are failed.

The deadline for complete phasing out of the Post Graduate Certificate in Informatics (Information Systems Audit) old curriculum) is 2020 after which students must automatically switch to the Post Graduate Certificate in Informatics (Information Systems Audit) (revised curriculum).

**BACHELOR OF INFORMATICS HONOURS  
(Web Informatics)**

**08BIHW**

**NQF Level: 8**

**NQF Credits: 120**

**NQF Qualification ID: Q2252**

**Description**

The Bachelor of Informatics Honours is a postgraduate specialisation degree that aims at providing educational opportunities for students who are interested in and motivated to work as Web and Business Informatics Specialists or related practices. This programme is purposefully designed to develop students' ability to conduct supervised research by applying advanced concepts, theories, tools, and methods of Informatics. In this context, specific emphasis is placed on internationally accepted general standards and practices, as well as key attributes that would enable graduates to assume supervisory/middle management and applied research positions in the Computing industry, academia, and in the public sector in general.

Graduates of this programme will be able to find employment or entrepreneurship in the public and private sectors as Informatics specialists (e.g. Research Assistants, Web and Data Analyst etc.).

**Criteria for Admission**

Applicants may be considered for admission to this programme if they have a Bachelor's degree in Informatics from NUST, or an equivalent qualification at NQF Level 7 from a recognised institution, worth at least 360 credits.

Applicants are required to submit the following documents with their applications:

- A professional resume, highlighting practical and professional Computing and IT experience, if applicable.

**Articulation Arrangements**

Transfer of credits will be dealt with according to the NUST's rules and regulations on Recognition of Prior Learning. These provide for course-by-course credits as well as credit transfer by volume under certain academic conditions. Maximum credit that can be granted is 50 % of the credits for a qualification.

Upon successful completion of the Bachelor of Informatics Honours, students will ordinarily be able to pursue further studies in the same, or a related cognate area of learning, at NQF Level 9.

**Mode of Delivery**

The programme will be delivered on the full-time and part-time modes of study in accordance with NUST rules. The E-learning mode will only be considered after the programme has reached a certain level of maturity.

**Requirements for Qualification Award**

The Bachelor of Informatics Honours degree will be awarded to students credited with a minimum of 120 NQF credits at NQF Level 8, and who have met the detailed requirements as set out below. In addition, students should meet the administrative and financial requirements as spelt out in the NUST General Rules and Regulations. Students can specialise in Web Informatics or Business and must complete one-core compulsory (CC) courses (worth 15 credits); four strand compulsory courses (SC) (worth 45 credits); one strand elective (SE) course (worth 15 credits); and a Mini-thesis (worth 45 credits).

**Transition Arrangements**

The Bachelor of Informatics Honours (old curriculum) will be phased out systematically until 2021 with minimal disruption to existing students' learning progression. The last intake of students for the Bachelor of Informatics Honours (old curriculum) was in January 2019.

Students who are registered on the Bachelor of Informatics Honours (old curriculum) will be allowed to transition to the Bachelor of Informatics Honours (revised curriculum) but may lose credits. Students who are registered in 2019 for Bachelor of Informatics Honours (old curriculum), and who fail more than 50% of the courses at the end of 2019, will be required to change their registration to the Bachelor of Informatics Honours (revised curriculum) and will be granted credits on a course-by-course basis in accordance with the information in the Table below.

The Bachelor of Informatics Honours (revised curriculum), will take effect from January 2020. Students who fail any of the courses on the old curricula will be required to repeat such failed courses based on the syllabi of the new/revised corresponding courses in the Table below.

The deadline for complete phasing out of the Bachelor of Informatics Honours (old curriculum) is 2021, after which, students must automatically switch to the Bachelor of Informatics Honours (revised curriculum).

**BACHELOR OF INFORMATICS HONOURS  
(Business Informatics)**

**08BIFB**

**NQF Level: 8**

**NQF Credits: 120**

**NQF Qualification ID: Q2252**

**Description**

The Bachelor of Informatics Honours is a postgraduate specialisation degree that aims at providing educational opportunities for students who are interested in and motivated to work as Web and Business Informatics Specialists or related practices. This programme is purposefully designed to develop students' ability to conduct supervised research by applying advanced concepts, theories, tools, and methods of Informatics. In this context, specific emphasis is placed on internationally accepted general standards and practices, as well as key attributes that would enable graduates to assume supervisory/middle management and applied research positions in the Computing industry, academia, and in the public sector in general.

Graduates of this programme will be able to find employment or entrepreneurship in the public and private sectors as Informatics specialists (e.g. Research Assistants, Web and Data Analyst etc.).

**Criteria for Admission**

Applicants may be considered for admission to this programme if they have a Bachelor's degree in Informatics from NUST, or an equivalent qualification at NQF Level 7 from a recognised institution, worth at least 360 credits.

Applicants are required to submit the following documents with their applications:

- A professional resume, highlighting practical and professional Computing and IT experience, if applicable.

**Articulation Arrangements**

Transfer of credits will be dealt with according to the NUST's rules and regulations on Recognition of Prior Learning. These provide for course-by-course credits as well as credit transfer by volume under certain academic conditions. Maximum credit that can be granted is 50 % of the credits for a qualification.

Upon successful completion of the Bachelor of Informatics Honours, students will ordinarily be able to pursue further studies in the same, or a related cognate area of learning, at NQF Level 9.

**Mode of Delivery**

The programme will be delivered on the full-time and part-time modes of study in accordance with NUST rules. The E-learning mode will only be considered after the programme has reached a certain level of maturity.

**Requirements for Qualification Award**

The Bachelor of Informatics Honours degree will be awarded to students credited with a minimum of 120 NQF credits at NQF Level 8, and who have met the detailed requirements as set out below. In addition, students should meet the administrative and financial requirements as spelt out in the NUST General Rules and Regulations. Students can specialise in Web Informatics or Business and must complete one-core compulsory (CC) courses (worth 15 credits); four strand compulsory courses (SC) (worth 45 credits); one strand elective (SE) course (worth 15 credits); and a Mini-thesis (worth 45 credits).

**Transition Arrangements**

The Bachelor of Informatics Honours (old curriculum) will be phased out systematically until 2021 with minimal disruption to existing students' learning progression. The last intake of students for the Bachelor of Informatics Honours (old curriculum) was in January 2019.

Students who are registered on the Bachelor of Informatics Honours (old curriculum) will be allowed to transition to the Bachelor of Informatics Honours (revised curriculum) but may lose credits. Students who are registered in 2019 for Bachelor of Informatics Honours (old curriculum), and who fail more than 50% of the courses at the end of 2019, will be required to change their registration to the Bachelor of Informatics Honours (revised curriculum) and will be granted credits on a course-by-course basis in accordance with the information in the Table below.

The Bachelor of Informatics Honours (revised curriculum), will take effect from January 2020. Students who fail any of the courses on the old curricula will be required to repeat such failed courses based on the syllabi of the new/revised corresponding courses in the Table below.

The deadline for complete phasing out of the Bachelor of Informatics Honours (old curriculum) is 2021, after which, students must automatically switch to the Bachelor of Informatics Honours (revised curriculum).

**MASTER OF DATA SCIENCE**  
**(Phased in 2022)**

**09MADS**

**NQF Level:**

**NQF Credits: 240**

**NQF Qualification ID:**

**Description**

The Master of Data Science is designed to provide students with sound theoretical, research and professional skills in data science. The programme will further, equip students with skills relevant to create, validate and transform data and derive insight from data. Students will gain deepened knowledge of contemporary data management and analysis technologies, including those for data collection, processing and storage, visualisation, cloud-based infrastructure, and software project management. More crucially, students will learn how to properly present and communicate results and data-driven insights to maximise their impact on business and industry. Finally, students will learn to observe ethics and governance rules appropriate for the dataset.

Graduates, will be capacitated to respond to the need in the industry for advanced data analytics skills, focused on various fields or application domains, including customer intelligence, bioinformatics and healthcare, agriculture, engineering, physics and its related sciences, computer vision, natural language processing and text analytics.

With this programme, students will also be able to work with vast amounts of (local and international) data in the industry, business, and government, using appropriate techniques and analytical tools and software to conduct data analytics and solve complex data-driven problems. They will be independent, with a strong personal and work ethic, and a desire to contribute towards, and effect change in the community and broader work environment. The programme is further, designed with an applied research component to enable students to contribute to research in Data Science. This is achieved through designing and executing a research study and effectively communicating the findings of their research output in the disciplines and fields related to data science, including artificial intelligence, machine learning, advanced data management, visualisation, and summarisation.

**Criteria for Admission**

Applicants may be considered for admission to this programme if they hold a Bachelor's Honours degree in any of the following fields: Computer Science, Informatics, Information Systems, Statistics, Engineering, Mathematics or Physics at NQF Level 8, or an equivalent qualification in a related discipline from a recognised institution with evidence of supervised research.

All applicants' proficiency in Mathematics for Data Science will be assessed. Applicants with a deficiency in mathematics (for data science) may be required to enrol for the relevant course to address the gap at the discretion of the Department.

Applicants are required to submit the following documents with their applications:

- A curriculum vitae, highlighting practical experience in Computing, Engineering, or data modelling. Applicants from other fields with professional experience in related fields may apply and will need to provide a resume highlighting the scope of experience and its relevance to data science.
- A written proposal or motivation for undertaking further studies.

**Articulation Arrangements**

Transfer of credits will be dealt with according to the NUST's regulations on Recognition of Prior Learning. These provide course-by-course credits as well as credit transfer by volume under certain academic conditions. Maximum credit that can be granted is 50% of the credits for a qualification.

The Master of Data Science would ordinarily provide access to further studies in the same, or a related cognate area of learning, at NQF Level 10.

**Mode of Delivery**

The programme will be delivered on full-time and/or part-time mode in accordance with NUST rules and at the discretion of the department and based on the yearly intake.

**Requirements for Qualification Award**

The Master of Data Science degree will be awarded to students credited with a minimum of 240 NQF credits at NQF Level 9, and who have met the detailed requirements as set out below. Students are required to do compulsory courses (worth 140 credits), and a Thesis (worth 100 credits). In addition, students should meet the administrative and financial requirements as spelt out in the NUST General Rules and Regulations.

**Transition Arrangements**

This is a new programme which does not replace any existing programme(s). Transition arrangements are, therefore, not applicable.

### Assessment strategies

Courses will be assessed through diversified continuous assessment. For each of the courses, there will be a minimum of four (4) assessment activities. Continuous Assessments with Feedback will focus on the use of progressive, sufficient assessment events and evidence as a feedback tool to promote and improve learning and teaching approaches, and attaining the competencies required to demonstrate exit level outcomes rather than an accumulation of final pass marks through a series of assessment events. Intra-semester assessments will require prompt and constructive feedback.

Flexible and valid instruments will be used. Assessment methods will take the form of problem-solving exercises, and include, depending on the core skills expected to be demonstrated in relation to exit level outcomes, a combination of written questioning, observation of performance through written assignments, written tests, and individual or group assignment and presentations, case studies, report writing, and practical projects. The thesis will be assessed following the NUST's rules for studies at a postgraduate level. All courses require a final mark of at least 50% to pass.

### Quality Assurance Requirements

Moderation of assessments will be done in accordance with the NUST's general rules and guidelines on moderation. Each course (please refer to the detailed Qualification Requirements) will have one or more examiners and one or more moderators. Moderators will be identified from outside the Namibia University of Science and Technology and approved by the Senate. The required minimum qualification of the moderator should be a Doctoral degree, preferably in a field related to data science, including computer science and statistics, or the person must be a recognised expert in the field. Lecturing staff will set and grade assessments and/or examinations in accordance with set memoranda. Assessment instruments and memoranda will, together with relevant study material for that course and other material containing course learning outcomes in the context of the qualification learning outcomes, be forwarded to the moderator for moderation purposes.

The thesis will be moderated in accordance with the Namibia University of Science and Technology's rules for studies at a postgraduate level. Stakeholders will be invited to attend and comment on seminars and other presentations. This will ensure the quality of the assessment and the qualifications.

The following additional quality assurance arrangements will apply:

- Every course will be evaluated by the students immediately after its closure using an appropriate evaluation survey form which will include student evaluation of lecturers,
- Course contents/syllabi will be updated each semester before the course is offered,
- The curriculum review cycle will be Five years, regardless of changes, and
- Wide and in-depth consultation and benchmarking of the Programme will be done nationally and internationally.

**MASTER OF INFORMATICS**  
**(Phased in 2021)**

**09MAIN**

**NQF Level: 9**

**NQF Credits: 240**

**NQF Qualification ID: Q0506**

**Description**

The revised Master of Informatics programme is applied research-based (thesis) programme, designed to expand students' knowledge and expertise in Business Informatics, Web Informatics and other fields related to Informatics. Students will develop a thorough understanding of relevant methodological approaches, and develop competence in the application of theory, concepts, constructs and appropriate models for applied research including descriptive, explicative and simulation through participation in research activities and tasks to acquire understanding under the supervision of experienced supervisor.

The programme builds on previously acquired theoretical and practical knowledge at NQF level 8 and other scientific and industrial experience of the students to investigate and develop novel innovative ideas and products to solve problems in the field of Informatics.

The degree is designed for the candidates with Informatics background who seek to deepen and enhance competencies in their specialised areas. The programme will create a critical mass of skilled individuals in the field of Informatics that are of great need in the country and the world.

The end product of a Master of informatics study is the thesis, a research task completed under the guidance of supervisor that improves student's understanding to the field and prepares the graduate to embrace scientific approach in solving problem. The Master's degree programme in Informatics will provide guidance, training and mentorship for students from various Informatics-related fields, with the aim of preparing the next generation of Informatics experts and researchers.

**Criteria for Admission**

Applicants who hold a Bachelor Honours, NQF level 8 from recognised institutions, or equivalent qualifications, in disciplines related to Informatics may be considered for admission into this programme. Applicants need to provide evidence of having conducted supervised research and may be required to make-up specific deficiencies in coursework at the discretion of the Higher Degrees Committee.

In addition, applicants may be required to attend a pre-selection interview and or a test at the discretion of the department, particularly when applicant's coursework are considered to be at variance to the admission requirement of the programme. The Higher Degree Committee (HDC) will approve the final selection and admission of the candidates in accordance with the regulations as specified by the Rules for Postgraduate Studies of NUST. Registration prior to the approval of a research proposal is provisional and will be made official only when the Higher Degrees Committee approves the proposal. These procedures will be fully explained to each prospective student during his or her personal interview.

Applicants from other institutions must submit detailed information on all courses in their previous qualifications, as well as contact details of three referees. The latter also applies to applicants who have been working in the field after obtaining their previous qualifications. Exceptions may be approved by the Higher Degrees Committee, and all admissions are at the discretion of the Faculty Postgraduate Committee.

**Articulation Arrangements**

The Master of Informatics will ordinarily provide access to further studies in Informatics, or a related cognate area, at Doctoral degree level, i.e. NQF Level 10.

**Mode of Delivery**

This programme will be offered by research on a full-time and part-time delivery modes of study and in accordance with NUST General Rules and Regulations.

**Requirements for Qualification Award**

This qualification will be awarded to candidates credited with a minimum of 240 credits (all at NQF Level 9). The thesis will represent the entire body of work to be assessed and must meet the Namibia University of Science and Technology's requirements as detailed in the rules for postgraduate studies.

Students are *encouraged to submit* at least one manuscript for publication in refereed journal or book chapter or peer-reviewed proceedings of conference, symposium, and workshop and provide a proof of the submitted manuscript. The submitted work in peer reviewed sources should be in the area of the student thesis. In addition, students should meet the administrative and financial requirements spelt out in the NUST General Rules.

The minimum study period for the degree of Master shall be as determined by the notional learning hours required for each degree and the learning path provided by the different departments to provide for the attainment of the curricular requirements. The minimum period of registration for a master’s degree for full-time studies shall be two years and a maximum three years and for part-time studies shall be a minimum of four years and a maximum of six years.

The maximum study period for the degree of Master shall not exceed twice the recommended study period for such degree and may only be extended at the discretion of Senate. Students who fail to complete the degree within the maximum study period must reapply for admission to the degree.

**Assessment Strategies**

Students are expected to submit and present a research proposal and research plan for approval after six months for full-time and (by the end of the first year in case of part-time students) to the Higher Degrees Committee. It is compulsory that students attend regular research methodology seminars until successful defense and approval of their research proposal. In addition, students are required to present work-in-progress every six months during research seminars for monitoring and assessment purposes. Students who fail the initial assessment of the research proposal will receive an extension of six months for re-approval.

In compliance with the general requirements of HDC, students are required to submit a thesis for evaluation, which should comply with international academic standards. The thesis requires students to work independently and to investigate their own individual research topic. Students are required to cultivate a professional work ethic to deliver the combination of research, analysis, communication and presentation demanded by their thesis. The thesis will be assessed in accordance with the rules for studies at postgraduate level. Students will present and defend their thesis before an appropriate constituted committee in accordance with the rules for postgraduate studies at the Namibia University of Science and Technology. The thesis will be returned to students for correction, similarity checks and language editing before final binding and archiving. Final marks will only be released after correction of the thesis. Any other special arrangements on assessments will be done in accordance with the university’s rules and procedures for postgraduate studies.

**Transition arrangements**

The revised Master of Informatics (revised curriculum) will be phased-in 2021 with minimal disruption to existing students’ learning progression. The current programme (old curriculum) will be completely phased out by the end of 2020 after which students must automatically switch to the revised programme (new curriculum) and fulfil all requirements based on the new curriculum.

**DOCTOR OF PHILOSOPHY IN INFORMATICS**  
**(Phased in 2021)**

**10DPIN**

**NQF Level: 10**

**NQF Credits: 360**

**NQF Qualification ID: Q0507**

**Description**

The Doctor of Philosophy (PhD) in Informatics is an applied research-based (by thesis only) programme, designed to expand and enhance students' knowledge and expertise in the field of Informatics. The PhD in Informatics programme is of interdisciplinary nature and aims at enabling students to become scientific researchers in various fields of study related to Informatics. The programme exposes students to conduct emerging research and develop innovative ideas and products required to solve problems in key areas of technology affecting businesses, communities and society at large. This programme further, provides students research and conceptual analysis skills to delve into subjects ranging from all emerging technology focus areas to Informatics related specialisations.

Further, the programme enables the students to analyse technology and sophisticated systems with the intent of design and development for informatics methodology. The programme provides a platform for the students to conduct Informatics research that assist Namibia, the African continent and contribute to the World. The precise focus of the research will be determined through dialogue between the student and supervising staff and will fall within the scope of the approved research clusters of the Faculty of Computing and Informatics (FCI).

The revised PhD in Informatics programme aims to produce a graduate who possesses an in-depth and Informatics wide knowledge of a specialised area of the discipline with clear understanding on the scientific methods and capability to conduct independent and guided research. The optimal goal is then to have a student who can apply the scientific methods and techniques to deal with sophisticated problems connected to the topic of interest, to make an original contribution to the discipline.

**Criteria for Admission**

Applicants who hold qualifications from recognised institutions at NQF level 9, or equivalent, in Informatics or related cognate areas, may be considered for admission to this programme. Applicants need to provide evidence of having conducted supervised research at this level.

In addition, applicants may be required to attend a pre-selection interview at the discretion of the department, particularly when applicant's coursework are at variance to the admission requirement of the programme.

The Higher Degree Committee (HDC) will approve the final selection and admission of the candidates in accordance with the regulations as specified by the Rules for Postgraduate Studies at NUST.

Registration prior to the approval of a research proposal is provisional and will be made official only when the proposal is approved by HDC. These procedures will be fully explained to each prospective student during his or her personal interview.

**Articulation Arrangements**

The PhD in Informatics is a terminal qualification hence no articulation arrangements are proposed.

**Mode of Delivery**

The programme will be offered on a full-time or part-time basis in accordance with NUST's General Rules and Regulations.

**Requirements for Qualification Award**

This qualification will be awarded to candidates credited with a minimum of 360 credits at NQF Level 10. The thesis will represent the entire body of work to be assessed and must meet the Namibia University of Science and Technology's requirements as detailed in the rules for postgraduate studies. In addition, students should meet the administrative and financial requirements as spelt out in Part 1 of the Namibia University of Science and Technology General Rules.

Students will be required to satisfy the following conditions: at least two manuscripts published/accepted for publication in refereed journals and/or book chapters and/or peer-reviewed proceedings of conferences, symposiums, workshops, etc. A full bibliographical detail must be provided for each publication. For each publication indicated as being "accepted for publication" (not published yet), a copy of the letter of acceptance from the relative authority must be submitted. The submitted work in peer-reviewed sources should be in the area of the student thesis.

A minimum of three (3) years and a maximum period of five (5) years are required to complete the programme, if registered on the full-time mode. A minimum of six (6) years and a maximum of eight (8) years are required if registered on a part-time mode. The study period may be extended with the express approval of Senate.

### Assessment Strategies

Students are expected to submit and present a research proposal and research plan for approval after 9 months for full-time and (by the end of the 18 months in case of part-time students) to the Higher Degrees Committee. It is compulsory that students attend regular research methodology seminars until successful defense and approval of the research proposal. Students are required to present a work-in-progress report every six months during research seminars for monitoring and assessment purposes. Students who fail the initial assessment of the research proposal will receive an extension of six months for re-approval.

In compliance with the general requirements of the Senate, students are required to submit a thesis for evaluation, which should comply with international academic standards. The thesis requires students to work independently and to investigate their own individual research topic. Students are required to cultivate a professional work ethic to deliver the combination of research, analysis, communication and presentation demanded by their thesis. The thesis will represent the entire body of work to be assessed in accordance with the rules for studies at postgraduate level.

Students will present and defend their thesis before an appropriately constituted committee in accordance with the rules for postgraduate studies at the University. The thesis will be returned to students for correction before final binding and archiving. Final marks will only be released after correction and submission of the thesis. Any other special arrangements on assessments will be done in accordance with the University's rules and procedures for postgraduate studies.

### Transition arrangements

The revised Doctor of Philosophy in Informatics (new curriculum) will be phased-in 2021 with minimal disruption to existing students' learning progression. The current programme (old curriculum) will be completely phased out by the end of 2020 after which students must automatically switch to the revised programme (new curriculum) and fulfil all requirements based on the new curriculum.

**DEPARTMENT OF JOURNALISM AND MEDIA TECHNOLOGY  
QUALIFICATIONS OFFERED**

**CODE: 38**

Bachelor of Journalism and Media Technology Honours (Phased in 2021)  
Master of Journalism and Media Technology

08BJOH  
09MJMT

**BACHELOR OF JOURNALISM AND MEDIA TECHNOLOGY HONOURS**

**08BJOH**

**NQF Level: 8**

**NQF Credits: 120**

**NQF Qualification ID: Q0678**

**Description**

The Bachelor of Journalism and Media Technology Honours is an initial postgraduate Degree, registerable at National Qualifications Framework (NQF) level 8. This programme builds on the outcomes of the Bachelor of Journalism and Media Technology, and aims to consolidate and deepen the knowledge and skills of students in the main cognate area of learning, as well as developing their capacity to conduct supervised research of an applied nature. Through this programme, students will be enabled to analyse theoretical material and demonstrate independent and critical analytical skills.

The programme requires an advanced level of conceptual and analytical ability as well as intellectual autonomy. The Bachelor of Journalism and Media Technology Honours is structured to enable students to practice in the field of Journalism and Media Technology, as well as Public Relations while interacting with people and organisations through the media.

**Criteria for Admission**

Candidates will be considered for admission into the Bachelor of Journalism and Media Technology Honours Degree if they have a Bachelor of Journalism and Communication Technology or a Bachelor of Journalism and Media Technology Degree from NUST. Alternatively, applicants with an equivalent qualification at NQF level 7 or a relevant three-year Bachelor Degree (pre-NQF) from a recognised institution, of at least 360 credits, may be considered for admission into this Programme. Such applicants, however, may be required to make up specific shortcomings as deemed necessary, on a case-by-case basis by the departmental selection panel.

Applicants who are holders of a National Diploma in Journalism and Communication Technology (pre-NQF) shall be considered for admission on a case-by-case basis.

In keeping with departmental requirements, all applicants who qualify shall be required to write a General Knowledge Test and be interviewed.

**Articulation Arrangements**

Transfer of credits will be dealt with according to the NUST regulations. These provide for course-by-course credits as well as credit transfer by volume, under certain academic conditions. Maximum credit that can be granted is 50 % of the credits per qualification.

Upon successful completion of the Bachelor of Journalism and Media Technology Honours programme, students will ordinarily be able to pursue further studies in the same, or a related cognate area of learning, at NQF Level 9.

**Mode of Delivery**

This programme will be offered *via* the part-time mode of study in accordance with NUST General Rules and Regulations.

**Requirements for Qualification Award**

This revised qualification will be awarded to students credited with a minimum of 120 NQF credits (all at Level 8), and who have met the requirements of the compulsory and core elective sections. Students are required to complete compulsory courses amounting to 90 credits, and a mini-thesis or a Media Research Production of 30 credits. Furthermore, students should comply with the administrative and financial requirements as indicated in the General Rules and Regulations of NUST.

**Transition Arrangements**

The Bachelor of Journalism and Media Technology Honours (old curriculum) will be phased out completely by the end of 2020. The Bachelor of Journalism and Media Technology Honours (revised curriculum) will be offered in January 2021. There are no significant changes made to the revised curriculum, therefore, courses will only be offered based on the revised syllabi in 2021. Students however, will be granted credits on a course- by -course basis in accordance with the Table below.

Students who fail any of the courses in the old curriculum will be required to repeat such courses based on the syllabi of new/revised corresponding courses. Please refer to the Table below, for detailed information on the new/revised corresponding courses.

The deadline for complete phasing out of the Bachelor of Journalism and Media Technology Honours (old curriculum) is end of 2020, after which students must automatically switch to the revised/new programme and fulfil the requirements based on the revised/new curriculum.

**Courses to be credited**

Course Code	Bachelor of Journalism and Media Technology Honours (Old Courses)	Course Code	Bachelor of Journalism and Media Technology Honours (Equivalent New/Revised Courses)

## MASTER OF JOURNALISM AND MEDIA TECHNOLOGY

09MJMT

NQF Level: 9

NQF Credits: 240

NQF Qualification ID: Q1111

### Description

The Master of Journalism and Media Technology is aimed at equipping students with highly specialised knowledge, skills and competencies in journalism practice, media technology and problem solving. This programme further provides students with an opportunity to conduct in-depth research, independently, using the scientific method and synthesis knowledge at the forefront of journalism and media technology, while adhering to the applied nature of the journalism profession. The degree allows students to interrogate and implement approaches that serve to influence the media house as entity that interacts with academic institutions.

### Admission Criteria

Candidates will be considered for admission into the Master of Journalism and Media Technology if they have a minimum of a Bachelor of Journalism and Media Technology Honours at NQF Level 8, or a 4-year pre-NQF qualification with a research component in the aforesaid fields, or equivalent qualification in a related discipline from any other recognised institutions. In either case, candidates should have proven evidence of having conducted supervised research.

Candidates may be required to attend a pre-selection interview and/or test at the discretion of the Postgraduate Studies Committee to ascertain their competencies in respect of research.

Applicants from other universities should submit detailed information regarding courses successfully completed in previous qualifications, especially the research project or thesis. It is the responsibility of the student to ensure that they have at their disposal detailed information about the courses in qualifications conferred on them previously. The contact details of three referees should also be provided. This applies to applicants who had been working in the journalism or media profession since obtaining the aforesaid qualifications. Admissions are done at the discretion of the Postgraduate Committee, who would also decide on exemptions to be approved.

### Articulation Arrangements

The transfer of credits would be done in accordance with NUST's regulations regarding the Recognition of Prior Learning (RPL). Such an approach considers course-by-course credits, as well as credit transfer by volume, under certain conditions. The maximum credit that can be granted is 50% of credits per qualification. No articulation is provided for the research component of this degree.

The Master of Journalism and Media Technology would ordinarily provide access to further studies at NQF Level 10 in the same or similar cognate area of learning.

### Mode of Delivery

This qualification will be offered via the full-time block-release sessions in accordance with NUST General Rules and Regulations.

### Requirements for Award Qualification

The Master of Journalism and Media Technology will be awarded to candidates credited with a minimum of 240 NQF credits (all at Level 9). Students are required to complete four compulsory courses amounting to 80 credits, three elective courses amounting to 160 credits, which includes 120 credits in respect of either the Thesis or the Research Production. In addition, students must meet the administrative and financial requirements of NUST as set out in General Rules and Regulations.

### Transition Arrangements

This is a new programme it does not replace any existing programme(s). Therefore, transition arrangements are not applicable.

### Assessment Strategies

The courses will be assessed by means of diversified continuous assessment. For the purpose of ensuring authenticity of assessment evidence, at least 50% of the assessment events that make up the final mark will be conducted under controlled conditions similar to those under which institutional examinations are conducted. In the event of the assessment conditions not being appropriate for the nature of the assessment, the lecturer and the department must take appropriate and rigorous steps to ensure such authenticity. In accordance with NUST's policy on diversified continuous assessment, each course will have a minimum of six assessments.

The Thesis and Media Research Production Project will be assessed in accordance with the University's rules concerning post-graduate studies.

### Quality Assurance Arrangements

Each course (please refer to the Detailed Qualification Requirements) offered in this programme will have one or more examiner(s) and one moderator. Only external moderators will be identified and contracted and their minimum qualification would be a Master's Degree with relevant industry experience. The Moderators shall be respected experts in the field of journalism, media technology and Public Relations, appointed by Senate.

The academic staff will set and mark tests, assignments and/or examinations. Thereafter, the graded assessments, memoranda and course material, together with the course outlines stipulating the desired learning outcomes, are to be forwarded to the Moderator. The system of moderation is in place to heighten the quality of assessment and the qualification as a whole.

As for the Thesis/Media Research Production Project, this will be moderated in accordance with NUST Rules and Regulations for post-graduate studies.

In the programme will be offered in a flexible mode. However, the courses will be listed per semester in order to fit the regular curriculum structure.
